

Farrukh Djumayev

Frontend Developer | React · Next.js · TypeScript

Tashkent, Uzbekistan · farrukh.front.dev@gmail.com · +998 (88) 811-41-71
Portfolio · GitHub

PROFILE

Frontend Developer specializing in React, Next.js, and TypeScript, with hands-on experience building production web platforms, dashboards, Telegram Mini Apps, and REST API integrations. Strong in reusable component architecture, state management, responsive UI, accessibility, and performance-focused implementation. Currently expanding backend and software engineering capabilities through School 21.

EXPERIENCE

Independent Frontend Developer	2024 – Present Tashkent
- Build and ship production-ready web applications from requirements and UI implementation through deployment. - Design reusable component systems and responsive interfaces with React, Next.js, TypeScript, Tailwind CSS, and modern UI libraries. - Integrate REST APIs, implement client-side state and data flows, and optimize frontend delivery for fast, reliable user experiences. - Deploy and maintain applications on Vercel with cross-browser and responsive support.	

SELECTED PROJECTS

School 21 CareerHub · careerhub.21-school.uz Next.js · React · TypeScript · Tailwind CSS · ShadCN UI	2026
- Engineered the frontend of an end-to-end career platform connecting School 21 students with technology employers. - Built dashboards, student portfolios, vacancy filters, authentication flows, and application-tracking interfaces. - Integrated REST APIs and reusable responsive UI components across student and employer workflows.	
PAYMEX — Telegram Mini App · Demo React · JavaScript · Telegram WebApp API · ITCSS	2026
- Engineered a mobile-first frontend for financial services, currency exchange, and international payments. - Implemented Telegram WebApp integration, responsive glassmorphism UI, and a scalable ITCSS-based styling architecture. - Designed touch-friendly responsive layouts with accessibility and cross-device behavior in mind.	
Kokand University — Web Platform · kualumni.uz React · TypeScript · Vite · Tailwind CSS · ShadCN UI · Radix UI	2025
- Built a modern university web platform covering academic programs, student life, international programs, and admissions. - Implemented reusable UI with ShadCN/Radix components and Tailwind CSS, with responsive and SEO-focused frontend structure.	
Kelajakka Qadam — Educational Center Website · Demo HTML · CSS · JavaScript · Responsive Design	2024
Built a responsive promotional website presenting courses, links, and educational-center information with a clean, focused layout.	

EDUCATION

Software Engineering Program · School 21 / 42 Network Peer-to-peer software engineering, backend development, algorithms, C/C++, and system programming.	2024 – Present
Frontend Development Program · Najot Ta'lim React, Next.js, TypeScript, state management, and UI engineering.	Completed

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript
State & Data: Redux Toolkit, Zustand, React Query, REST APIs, Axios
UI Engineering: Tailwind CSS, ShadCN UI, Radix UI, Responsive Design
Architecture: Reusable Components, ITCSS, API Integration, Accessibility
Tools: Git, GitHub, Vercel, npm
Languages: Uzbek (Native) · English (Professional Working Proficiency)
